Hurry Lets Go App - Requirement Document

Team	Name (Alias)
Original App Idea	Rich Garrick
Developers	Rich Garrick
Test	Rich Garrick
UX Design	Rich Garrick

Key Dates

Date	Changes
Initial Idea	**10/24/2017**

Goals:

Make it easy for the users find something to do in a limited amount of time
Allow users to change fields and desired activities to best find something fun to do
Allows users to save locations they are interested in
Allow users to easily navigate through the saved locations to find a place they want to go again via rating.
Additional goal: Connect to your friends and share your activities with them.

Features:

There can be endless things that can be added to the app but we should implement at least below:

1. User inputs zipcode and gets list of locations for drinks nearby
2. User inputs zipcode and gets list of locations for food and drinks nearby
3. User inputs zipcode and gets list of locations for entertainment nearby
4. User defines radius to give to search locations
5. User can save locations to view later
6. User can login with credentials to view saved data

Additional Features:

1. Time period given to settings will change returns of what user gets as far as time taken per activity
2. GeoLocation used to display selected activity instead of inputted location
3. Allow user to share planned activity with another user
4. Allow users to submit ideas to each other for pre-planning activity
5. Allow user to place reservations through app to determined location
